

Satellite Radio is a wonderful alternative to regular programming. Since I pay for the service it is not up to the NAB to determine what and how I will listen to the radio. The traffic reports and up to date weather are an awesome addition to the many commuters that need on going up to date traffic information that many of the local stations do not provide. Please do not allow the NAB to make my decisions for me. I respectfully request the FCC to reject the NAB petition 04-160. I do support satellite radio's ability to provide the programming that I want and that I am paying for.
